MESSAGE FROM THE PRINCIPAL

The position of technical and vocational science in the world has been an important one. Never, however, has vocational science enjoyed the prestige it possesses today. The need for technically trained men in today's struggle is imminent.

Those who gave up this opportunity now look with a twinge of genuine respect and envy at those of you who are triumphantly equipped to go forth dauntlessly to face the future.

Our exceptionally fine courses which have sent forth many of our young men into successful careers are difficult ones. In the end, however, you have a wonderful technical training to enable you to establish for yourself a position in a world which needs your services tremendously.

But the years pass swiftly, and the time of parting is at hand. Your high school years are over to the extent that you are now mature young adults and responsible for yourselves to face life with minds strengthened by truth, wills disciplined by self-control. Under the guidance of an able faculty, you are destined to be enriched by the technical training bestowed on each of you by this high school.

Acknowledgment

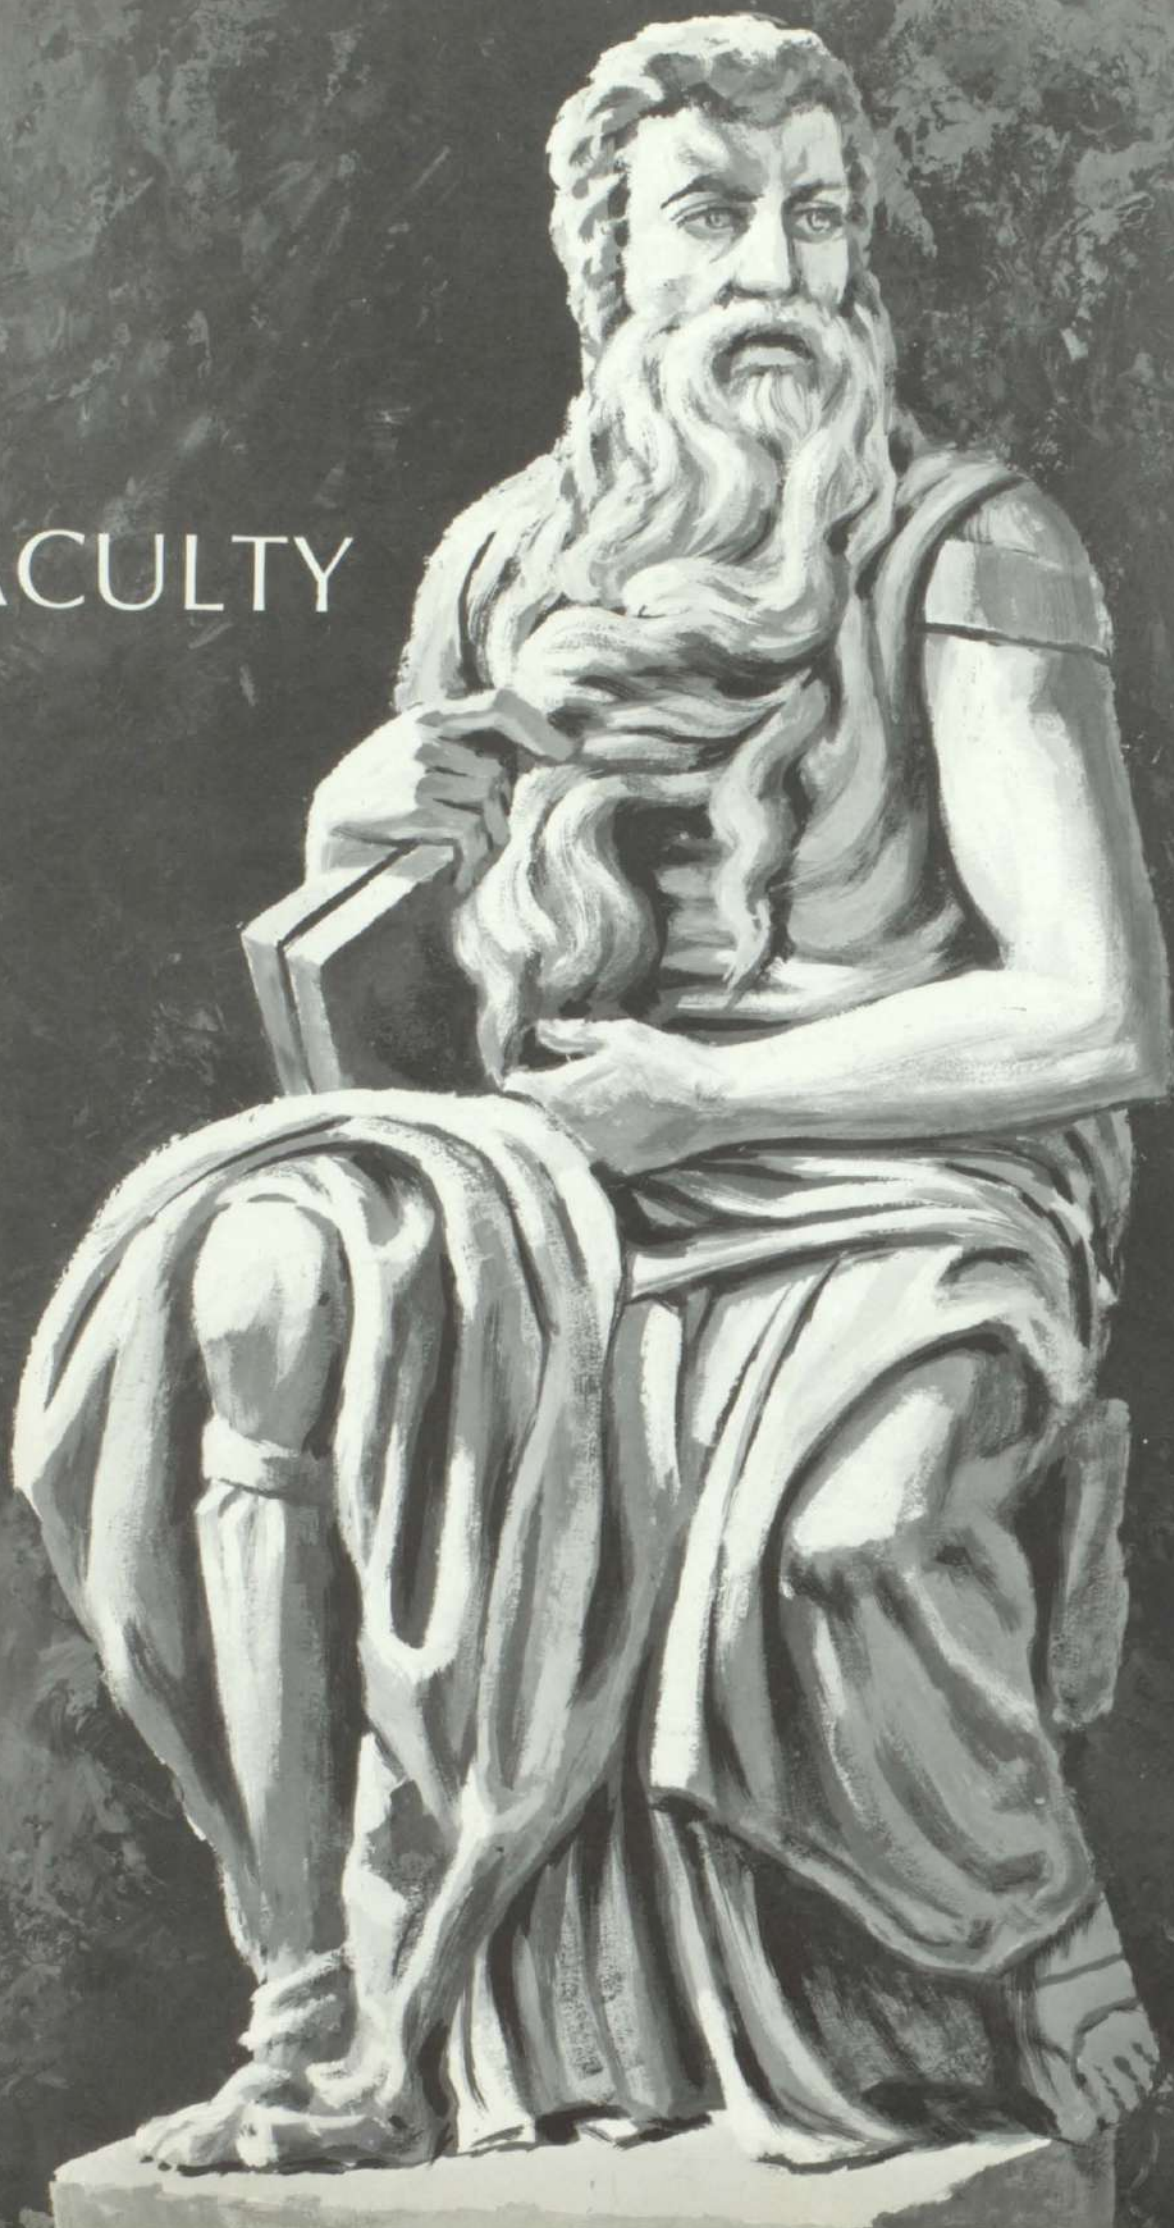

The Key to our success depends upon the skills and knowledge we have for tomorrow.

All of us will work in our various fields, ever striding to obtain a higher goal.

To obtain this higher goal, each student must understand the technology of the future; the technology of success.

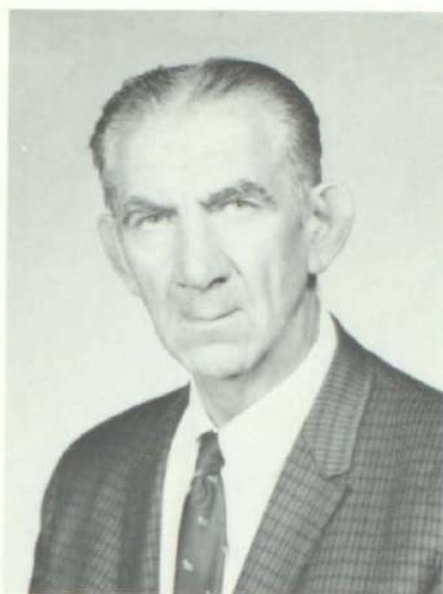

Upon graduation the completion of the first requirement toward this goal will be reached. The first rung in the long ladder of success.
