GRADUATION

The word is like music to my ears and sugar on my lips. After four long years, some of us may have completed our journey before others, but none the less, it has all come to an end for the most part. Acquaintanceship and friendships may be lost, but a great sense of pride and need for further advancement in life will take their place. Never forgotten and always remembered are each of us in each others' hearts and minds. We have been through good times and sometimes bad, yet here we still stand united and completing a common goal. We have come this far and perhaps we will look back one day and remember all the things that brought us together and the things that may have kept us apart

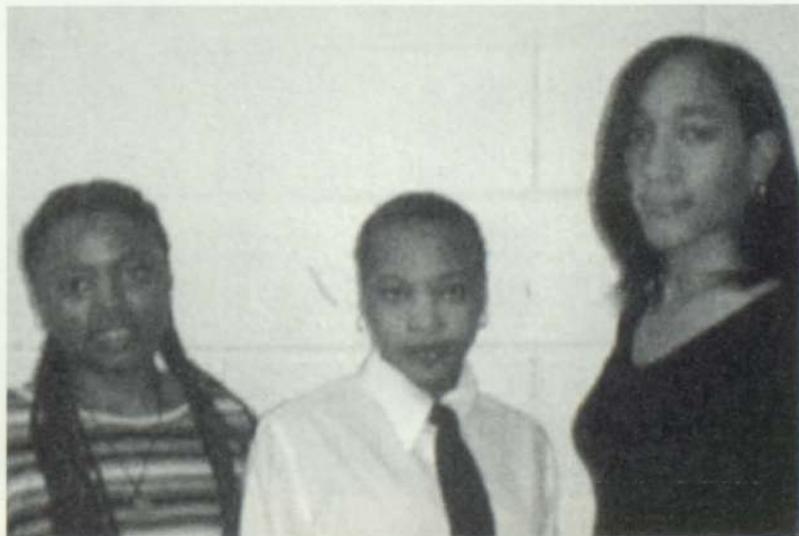

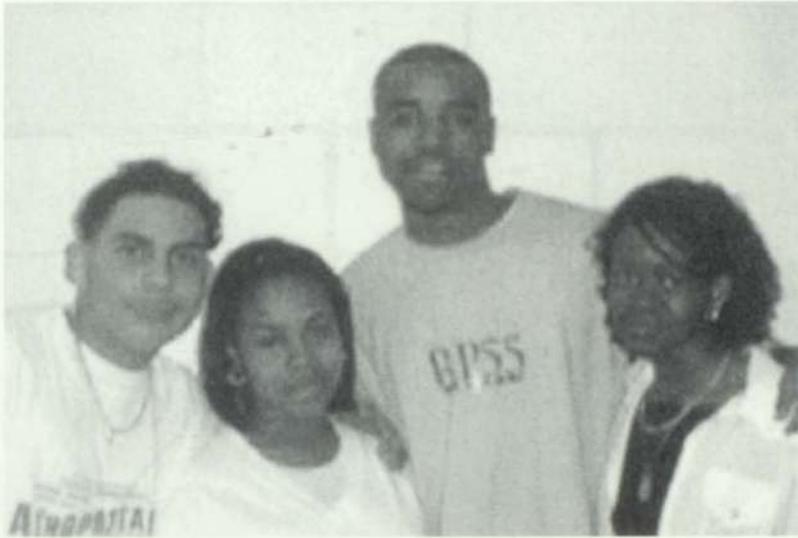

Success

At least we have a key piece in the Evolution game. Now put this piece into good use and go solve the freakin' puzzle. Its' up to you to either advance or put it on hold. I won't believe that YOU did all this for nothing. You had the courage to complete the four years, now finish the game and make me proud. I love you all no matter what anyone said and I hope that when we see each other at our reunion we would have all lived up to our potential. Recall my words, follow your dreams and always remember that the world awaits for no one, so if you want it you have to go out and get it yourself. See you when were older and hopefully wiser and successful.

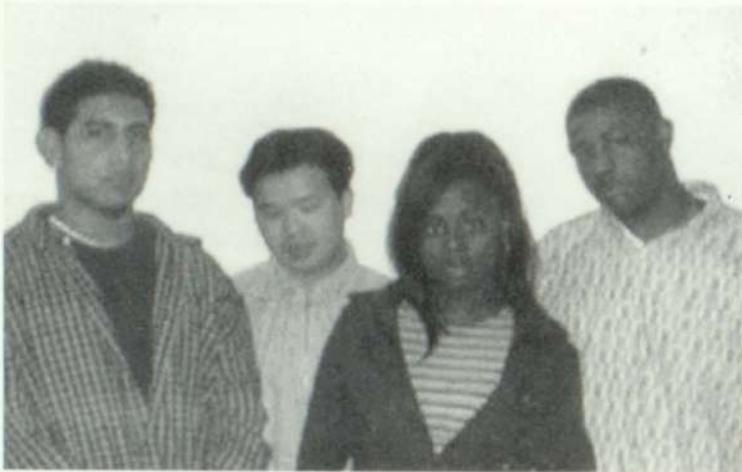

Love always,
Lus Rivera

September 1997 brought something new to Newark Tech. As a result of a grant, Newark Tech became the first building to experience an ITV classroom.

ITV stands for Interactive Television. Interactive Television is a form of distance education where students can see and hear the instruction via a television. ITV now allows both students and teachers at Newark Tech and other schools in the Essex County onsortia to see, hear, and respond to each other via video and audio in real-time.

The first program to be offered at Newark Tech was Mrs. Doran's class on the Holocaust. Using the technology in the ITV classroom Mrs. Doran and her 4th Period Junior English class interacted with classes from University High School and Technology High School
